

PHC Service Menu...

We will customize a program to suit the requirements of your landscape. (Common programs consist of 5, 7, or 12 visits a year.)

- ✓ **Property Assessment:**
Monitor, evaluate and treat at *each* visit.
Provide a comprehensive written report *after each* visit.
- ◆ Pest and Disease Management for all shrubs and ornamental trees under 20 feet.
 - ☐ **Soil Injections** (1x a yr) for recurring problems such as leaf miner, Japanese Beetle, and scale commonly found in plants such as Boxwood, Cherry, Birch, Plum, Holly, etc.
 - ☐ **Fungicide Applications** (3-4x a yr) as a proactive treatment for discoloration, anthracnose, rust and scab commonly found in plants such as Dogwoods, Crabapples, Plums, Hawthorne, etc.
 - ☐ **Horticultural Oil** (2x a yr) to suppress pests such as adelgids, scale and mites...

- ◆ Root & Soil Management
 - ☐ **Granular Fertilization with Tick Treatment** (2x a yr) in shrub beds and foundation plantings for basic health.
 - ☐ **Soil Test** (1x a yr / as needed) for optimum pH, nitrogen, potassium, and phosphorous levels.
 - ☐ **Rich-Roots®** (every two yrs) deep root fertilization to promote root growth and improved absorption of moisture and nutrients from the soil.
 - ☐ **Air Spade** (1x a yr / as needed) root collar excavation services to help identify girdling roots and improve soil structure for increased oxygen to the roots.
- ◆ Additional Preventative Therapy
 - ☐ **Anti-Desiccant** (1x a yr) to help conserve moisture in leaf tissue and minimize "winter burn" on broadleaf evergreens such as Andromeda, Azalea, Boxwood, Holly, Rhododendron, etc.
 - ☐ **Deer Repellent** (12x a yr)- 100% organic materials for shrubs targeted by browsing deer, including your perennial shrubs and flowers in the summer months, and your evergreen shrubs during the crucial winter months.

**Continual Care for
Your Growing
Investment**

Prescription

Plant Health Care

Our complete *prescription* PHC Program encompasses our professional services in arboricultural care **customized** to promote the maximum vitality, value and beauty of your landscape:

- ◆ Property Assessment on *each* visit
- ◆ Holistic Approach
- ◆ Preventative Care
- ◆ Early Detection
- ◆ Integrated Treatment Program
- ◆ Comprehensive written report of findings and treatments after *each* visit

(800) 822-3537

Insect & Disease Management

PHC is a preventative approach for plant care. Through regularly scheduled visits, our trained technician will assess your valuable ornamental trees and shrubs for pests and disease problems, providing treatment before or immediately upon diagnosis. **Early detection and careful monitoring can ensure the health and beauty of your plants.** Treatments are documented and reviewed at subsequent visits, thereby delivering optimum results.

Some common identifiable pests and diseases are:

- ◆ Lace bug
- ◆ Leaf miner
- ◆ Hemlock Woolly Adelgid
- ◆ Scale
- ◆ Black Vine Weevil
- ◆ Mites
- ◆ Discula/Anthracnose
- ◆ Cedar Apple Rust
- ◆ And More....

Soil & Root Management

A solid foundation is critical for plant health and beauty. Proper root growth and structure will improve nutrient absorption. Today's plants are under constant stress caused by salt, soil compaction, construction damage, lawn treatments, severe weather conditions, competition from adjacent plants and much more. **We can help to offset the cultural & environmental influences which harm plants.** With our PHC program, our trained technician will perform the necessary procedures to promote a positive growing environment for your plants.

These services might include:

- ◆ Soil Testing - analyze for proper pH, nitrogen, potassium, phosphorous levels.
- ◆ Soil Amendments - recommend as needed, an organic based fertilizer to improve the soil biology.
- ◆ Rich-Roots® deep root fertilization - inject patented fertilizer into the root zone delivering the nutrients for optimal root growth and superior absorption.
- ◆ Soil Aeration - alleviate compacted soil, improve oxygen to the root system, and augment root growth.
- ◆ Air Spade - safely expose the root system for inspection and/or treatment for enhanced root health.

Other Preventative Therapy

Since properties are not all alike, we provide other services in our *Prescription Plant Health Care Program* which include:

- ◆ Deer Repellent applications once a month (weather permitting) to discourage deer from browsing on your valuable plants.
- ◆ Anti-desiccant treatment for your broadleaf evergreens to help conserve moisture in the leaf tissue and minimize "winter-burn."
